

LUCAS PERROTA RORIZ

Software Engineer

SUMMARY

Creative, detail-oriented, hard working, software engineer with a deep interest in AI and Cybersecurity. Proven track record of creating and implementing successful frontend applications. Looking to bring my skills to a tech company with global reach.

WORK EXPERIENCE

Software Engineer at 100devs, Los Angeles, CA

December 2023 — Present

- Collaborated with a team of developers to build modern and responsive web applications using best practices
- Constructed semantically structured web applications
- Developed responsive applications to work on all devices

Recent Projects:

Holux Retail Website – Responsive landing page for a retail company that sells luxury houses with dark mode support. The Project implements JavaScript libraries to create animations and components. Inline form created with ConvertKit to capture emails.

Brewmasters Coffee Shop Website – Responsive landing page for a coffee company. Advertises its various products and their blog. Pop-up modal made with ConvertKit to capture emails.

iCoin Crypto Marketplace Wordpress Website – Responsive marketplace made with Wordpress for a crypto company. Made with elementor and other plugins.

Lotus Valentine Promotional Email – Responsive email made for a japanese and Karaoke restaurant. Tested and working in all major email clients

CoffeBreak Newsletter Email – Newsletter for a coffee shop with a modern design. Tested and working in email clients and mobile friendly.

Transactional Email – Transactional email informing customer about recent changes and advertising company services. Tested and working for major email clients with responsive design.
